## Technicians Update

**November 22, 2021**

Brothers and Sisters,

As a reminder the industry reset took place last year providing a 7.2% increase. The next reset analysis will take place in December of 2022 and a reset analysis will occur annually thereafter. New rates were provided last year which became effective December 6, 2020. Per paragraph 2 of the LOA, since the basic hourly rates/scales from the one-time adjustment exceed the basic hourly rates in Appendix A planned for December 5, 2021, these adjusted scales supersede. In other words, the new scale that we received last year remains in effect and there will not be an additional 1% increase on December 5<sup>th</sup> of this year.

In solidarity,

Vinny Graziano

Coordinator Technician and Related

Airline Division

International Brotherhood of Teamsters.
