

ALLEGIANT AIR TECHNICIANS AND RELATED IMPLEMENTATION UPDATE – June 15th, 2022

Brothers and Sisters,

At this point almost every aspect of implementing the new CBA has been accomplished.

The seniority challenges have been completed except for one and it is hoped that will be completed soon.

During ratification a question arose over the definition of field trips. It was agreed and relayed to everyone that asked, that field trips were negotiated to the industry standard of leaving the base to be considered for pay purposes. The CBA now properly reflects that understanding.

There are several outstanding grievances on language across the system that may provide further definition of the intent of the language. As these issues are adjudicated through the grievance process the results will be shared with you.

We are still attempting to schedule joint visits to the larger stations and I'm hopeful that will happen soon. I'm looking forward to those visits as it will provide a good opportunity to meet with you.

That is all for now but please keep in touch with your stewards and Local Business Agents to get the most up to date information.

Fraternally,

Bob Fisher
Airline Division Representative
International Brotherhood of Teamsters
